To:Future Skills Centre

To whom it may concern,

On behalf of The Pivotal Point, I would like to enthusiastically express our support for the Yukonstruct – Northlight Innovation Hub’s expression of interest in the opportunity outlined by the Future Skills Centre for skills development in Northern Canada.

Our relationship with Yukonstruct started 6 years ago, when The Pivotal Point was called upon to bring insight and connection for Yukonstruct’s dream of connecting many facets of Yukon’s entrepreneurial potential by joining forces with the university, the government, corporate entities, and the communities to enable the building of the Northlight Innovation Hub. Since that time, The Pivotal Point has been a trusted innovation coach and connector in the growth of Yukon University’s I&E centre, as well as a member of the I&E Advisory Council.

Yukonstruct’s expression of interest, crafted in partnership with the Sustainable Impact organization and others reflects an acceleration of the momentum they’ve already been able to achieve – providing a collaborative hub of expertise, programming and networking potential that will help fulfill the dream of a truly connected Yukon emphasizing the culture and collective wisdom of the region.

I am excited to support their vision as this moves forward.

Sincerely yours,

Valerie Fox
