

Project Workplan

Project Start

- Source Digital Skills training for Francophone members
- Align UFCW Canada pre-apprenticeship models within skilled-trades eco-system
- Make necessary adaptations to current pre-apprenticeship offerings
- Compile early indicators of success and targets for francophone digital skills launch
- Compile list of industry and educational partnerships and set timeline for entry into skilled trades eco-system.

Project Mi-Point

- Develop and pilot Digital Skills training for francophone members
- Contact and advise current pre-apprenticeship graduates with pathways available in the skilled trades eco-system
- Re-launch current pre-apprenticeship offerings with advice and guidance from skilled-trades network
- Compile mid-point data indicators for digital skills francophone enrollment
- Align industry and educational partner indicators of success with internal pre-apprenticeship standard.

Project End

- Advanced digital skills enrollment among francophone members
- Well established link between members and skilled trades pathways with accredited learning partners and educational institutions.
- Re-launched pre-apprenticeship training with well-established partner institutions connected to newly enrolled members
- Compile data and learning associated with digital skills awareness among francophone members
- Compile indicators of long-term success and partnership in skilled-trades eco-system as legacy component.
