Reviewer overall recommendation

Considering the proposal as a whole, do you think FSC should fund this project as a worthwhile contribution to the skills ecosystem?

Overall Recommendation:

- I recommend this project for funding
- I recommend this project for funding conditional on changes and/or more information
- I do not recommend this project for funding

Explain your reasoning for this recommendation.

This seems to be a series of independent projects running simultaneously without any economies of scale being realized. There was also little information provided throughout the proposal as to the outcomes of the initial phase of the project and no concrete plan for generating new evidence in this phase. Also, the incorporation of end-user perspectives is quite weak, as was the articulation of the competencies of the project partners, which offered no specificity as to the alignment between the skillsets of the proponents and the activities they are planning to undertake as part of this project.

What do you think are the strongest aspects of this project?

Strong linkage between the issue identified in the first phase (PLAR system inefficiencies) and the objectives of this phase

Where do you think the project has gaps or challenges?

I think the biggest gap is that there doesn't seem to be any connection between the various elements. For it to be a cohesive project rather than just independent initiatives there needs to be some benefit to funding it as a set and that did not come through in either the workplan or the budget, which also seems quite high as a result of the lack of efficiencies.
