Reviewer overall recommendation

Considering the proposal as a whole, do you think FSC should fund this project as a worthwhile contribution to the skills ecosystem?

Overall Recommendation:

- I recommend this project for funding
- I recommend this project for funding conditional on changes and/or more information
- I do not recommend this project for funding

Explain your reasoning for this recommendation.

This is actually in some ways a brilliant proposal and a novel use of what is originally federal funding. This band of post-secondary education institutions based in Atlantic Canada has seen a way of collaborating to improve PLAR process for all program partners. It is a large mount of money but not inappropriately so given its spread and use. Better PLAR processes are so critical to moving new workers into areas where there are shortages, especially when it comes to new Canadians. This project could have significant impact in the region and beyond.

What do you think are the strongest aspects of this project?

In addition to the comments above, the proponent has built into the project commitments the recognition of the importance of the flexibility in program delivery models; a commitment to equity seeking groups and EDI principals; as well as the importance of working with employers at the earliest stages of program development (esp. where PLAR is involved). The proposal has the markings of success.

Where do you think the project has gaps or challenges?

Given the range of partners and actors involved, the biggest challenge will be knowledge mobilization and dissemination of learning, however the proponent is well aware of this challenge. There is, however, most likely a history of working together on such projects.
