Reviewer overall recommendation

Considering the proposal as a whole, do you think FSC should fund this project as a worthwhile contribution to the skills ecosystem?

Overall Recommendation:

- I recommend this project for funding
- I recommend this project for funding conditional on changes and/or more information
- I do not recommend this project for funding

Explain your reasoning for this recommendation.

- Seven colleges plus the innovation centre in one proposal, huge 1.2M in-kind
- This is about Colleges becoming nimbler, better at recruiting and assessing underrepresented groups by working with industry to provide relevant training, faster - nice future orientation around PSE transformation.
- Clear learning questions across all 7 colleges, with a systemic focus
- Close gap between industry needs by activating under-repped groups
- Big emphasis on individualized plans, career guidance, recognition of previous experiences and credentials
- expands to new industries, strong EDI lens

What do you think are the strongest aspects of this project?

See above.

Where do you think the project has gaps or challenges?

Communications and telling a story about the huge range of experimentation ambition and results. These partners need a strategy for more joint reflection, more documentation, more opportunities to tell their story about:

1. Why they are doing this
2. What they are learning
3. Where this has gotten them to at a systems level.

Otherwise we are left with a lot of stories and learning lost through the complexity of this huge partnership.
