D. Equity, diversity, and inclusion (EDI)

Project incorporates the perspectives of end-users and other stakeholders, particularly groups facing barriers, in the design and execution of the project, presents practices grounded in EDI principles, and shows potential to further EDI.

Reviewer overall recommendation

Considering the proposal as a whole, do you think FSC should fund this project as a worthwhile contribution to the skills ecosystem?

Overall Recommendation:

- I recommend this project for funding
- I recommend this project for funding conditional on changes and/or more information
- I do not recommend this project for funding

Explain your reasoning for this recommendation.

Humber College has three very clear learning outcomes for this proposal that align with FSC's priorities and strategies:

Test the delivery of digital fluency micro-credentials provided to members of four key target populations (newcomers, youth, racialized and essential skills gap) using a blended model (mix of in-person and virtual delivery);

2. Enhance the current foundational digital fluency curriculum to develop a sector-specific micro-credential for the skilled trades that will build on the foundational DFW micro-credentials;

3. Explore the needs in the Francophone community for a stackable digital fluency micro-credentials and translate / adapt the current curriculum based on research and consultations.

What do you think are the strongest aspects of this project?

The strongest aspect of this project is the focus on equity, diversity and inclusion. This project aligns with Humber's EDI values and is situated as an important workforce access initiative in its universal design principles, in how they value and will leverage the expertise of their partners and learners, to create an innovative solution that can be scale-able across communities. Their project identified four major participant groups that guided their intake and eligibility requirements. These groups were: newcomers, youth, racialized persons and those with essential skills gaps.

Where do you think the project has gaps or challenges?

The only challenge apparent in this design is the reliance on a blended delivery model, which includes in-person experiences. This may be a challenge with uncertain nature of the pandemic; however, hopefully this project will be able to have in-person experiences in the later years of the plan.
