Reviewer overall recommendation

Considering the proposal as a whole, do you think FSC should fund this project as a worthwhile contribution to the skills ecosystem?

Overall Recommendation:

- I recommend this project for funding
- I recommend this project for funding conditional on changes and/or more information
- I do not recommend this project for funding

Explain your reasoning for this recommendation.

NORCAT's proposal builds on their existing FSC project by providing opportunities/career pathways for their target populations (youth, women, rural, and Indigenous people). For nearly all Canadian skilled labour companies, providing employment opportunities for these groups is embedded in their overall strategy. Engaging these target populations not only addresses a market need, but also provides a pathway to a meaningful career and sustainable economic security.

What do you think are the strongest aspects of this project?

The strongest aspect of this project is how it directly aligns with FSC's priorities. This project directly aligns with FSC's strategic priorities by enabling the testing, prototyping, and evaluation of new training approaches for equipping workers with necessary skills to be both productive and safe on the job – all day, every day. Beyond expanding the reach and engagement of students / trainees from our target populations, NORCAT is focused on developing, testing, and deploying two new blended learning programs that will test and evaluate the inclusion and utilization of augmented reality (AR) to expedite learning pathways while having meaningful learning outcomes as compared to the status quo.

Where do you think the project has gaps or challenges?

Year 2 (April 2022 - March 2023) seems like a full year. One challenge may be executing the heaviest part of the project during this year, especially while completing the tasks planned from the original contract.

Comments

NORCAT has provided a very strong proposal and plan for scaling their existing project with FSC.
