**Reviewer overall recommendation**

Considering the proposal as a whole, do you think FSC should fund this project as a worthwhile contribution to the skills ecosystem?

**Overall Recommendation:**

- I recommend this project for funding
- I recommend this project for funding conditional on changes and/or more information
- I do not recommend this project for funding

**Explain your reasoning for this recommendation.**

This project seems well thought-out and precise, however, some fundamental elements explaining the step-by step intentions for reaching the expected outcomes are missing. Clear and simplified language could benefit this project proposal to facilitate the understanding of the different goals.

**What do you think are the strongest aspects of this project?**

The project highlights the importance of creating bridges across stakeholders to guarantee an even outcome across the Atlantic provinces, and demonstrates how it intends to do so. It also specifically explains how the prototypes work in different functional areas of ECE but also recognize the interdependency of increasing the quality of working conditions, while expanding access to training in order to both retain existing qualified staff and increase desirability for potential new recruits. Finally, the intention to provide a framework for unqualified educators to reflect on their career aspirations and possible career pathways, and fostering a community of practice for administrators will increase the likelihood of ECEs pursuing their professional credentials demonstrates a comprehensive understanding of the array of needs and challenges present in this sector.

**Where do you think the project has gaps or challenges?**

First, the prototypes are mentioned throughout the document, but a definition is never provided. Second, the proposal mentions that the team has spoken "with educators from underserved populations and learned that there are unique challenges in access to training and career development that must be explored further", however, these unique challenges are not defined. In addition, the concept of iteration seems to be used in different ways in the document, it is not always clear what is meant by it. Finally, the staffing costs budgeted in the budget plan are not made explicit in the proposal (e.g., it is not clear why 4 service designers are needed).

### **Comments**

the emotional wording seems at times an unnecessary distraction for the reader/reviewer.
