Reviewer overall recommendation

Considering the proposal as a whole, do you think FSC should fund this project as a worthwhile contribution to the skills ecosystem?

Overall Recommendation:

- I recommend this project for funding
- I recommend this project for funding conditional on changes and/or more information
- I do not recommend this project for funding

Explain your reasoning for this recommendation.

The size and scope seem insufficient for the requirements of the call. The first phase hasn't been completed, so the full understanding of the model, approach, evidence etc. seems premature to determine a second phase. The proposal seems more like an extension of another cohort of the current project rather than a true adaptation and scale.

What do you think are the strongest aspects of this project?

The model is compelling and there's clear, if limited, demand.

Where do you think the project has gaps or challenges?

The degree of learning from the first cohort, plan and ambition for scale. The model would benefit from more clearly defined leadership, management, oversight from Indigenous led partners. It's not immediately clear why right to play should lead this work vs. local partners.
