**Reviewer overall recommendation**

Considering the proposal as a whole, do you think FSC should fund this project as a worthwhile contribution to the skills ecosystem?

**Overall Recommendation:**

- I recommend this project for funding
- I recommend this project for funding conditional on changes and/or more information
- I do not recommend this project for funding

**Explain your reasoning for this recommendation.**

This project application is \*really\* solid. The need and the plan are clearly laid out, with good attention to detail, and lots of clarity and justification for why the program is valuable and how it will adapt and expand from CAIP 1.0. This program will benefit a lot of folks, and the eye to skill development and opportunities "up the ladder" rather than focusing simply on getting an immigrant's foot in the door to employment is really smart. This program has the potential to change the shape of the future of Canadian employment in a way that most jobs/skills/immigration programs touch on but are not able to fully realize.

**What do you think are the strongest aspects of this project?**

The project is forward thinking, and works beyond the first stage of employment for immigrants. By focusing on meaningful employment, opportunities for advancement, and collaboration with employers and employees, including training and conversations with leaders, managers, and employees, this project has the potential to shift the nature of immigrant employment and advancement opportunities.

**Where do you think the project has gaps or challenges?**

Fundamentally, I think it is hard for those who are in precarious or vulnerable positions to be frank about their needs or perceptions of problems within their workplaces. I think the team is aware of this and considers some of the obstacles, but I'm flagging it because there is probably a bias towards silence on the part of employees, and a bias towards "everything is ok" among leaders and managers as well. The organization will need to do some heavy lifting to ensure that leaders/managers really "get" the challenges. I think it is already doing this.

**Comments**

Really excellent project. Highly recommend this for funding.
