Reviewer overall recommendation

Considering the proposal as a whole, do you think FSC should fund this project as a worthwhile contribution to the skills ecosystem?

Overall Recommendation:

- I recommend this project for funding
- I recommend this project for funding conditional on changes and/or more information
- I do not recommend this project for funding

Explain your reasoning for this recommendation.

I recommend this project for funding conditional on building a better understanding of the existing funding allocated to EPIC-VR by other organizations. It is a strong proposal given that it is clearly articulated how EPIC-VR builds upon, but is different from the original project (Be EPIC). Given the success and learnings from the original Be EPIC project, this appears to be a reliable organization to work with a track record. I think given the strong foundation from the original project, there is likely to be success from this second EPIC-VR project. The scope of the project is also targetted enough to one specific profession and one specific skill development that it will be easier to track / validate progress and outcomes then other broader projects.

What do you think are the strongest aspects of this project?

This project is very clearly planned out and well supported with strong evidence generated from the original Be EPIC project and other external sources. This project has the right stakeholders involved to capture the relevant inputs to succeed and capture and well staffed to ensure progress. This project has a strong foundation to build on from the existing Be EPIC project and also clearly demonstrates how it will capture relevant data / information and bring forth new and innovative skills approaches.

Where do you think the project has gaps or challenges?

I think it is important to better understand existing funding allocated to this project from other partners. This proposal cites that Motive.io has been working on creating the virtual environmental since January 2021. I think it is worth investigating the existing funding sources for this specific VR project including what funds are already committed by who, and specifically what these existing funds are being used for. If this project is already funded and well supported from others (given it has already engaged Motive.io), then I think it is important to understand what the incremental ROI on the potential funds from FSC would be.
